Welding and Production Experience

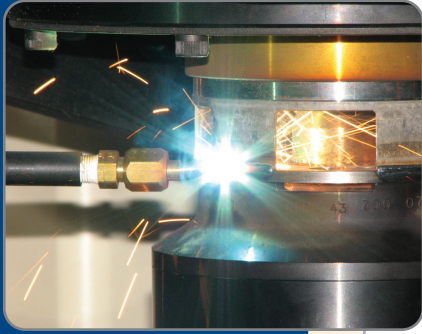

Need additional production capacity but cannot justify the large capital expense of a laser or capacitor discharge welding system?

Reduce Your Risk • Satisfy Your Customers • Save Money  
with PECO's Production Welding!

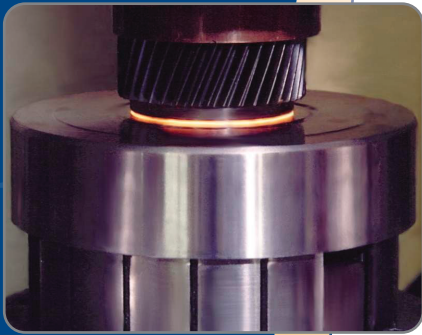

Our in-house welding experts and design engineers work to continuously drive quality and efficiency into the production process, resulting in quality parts, delivered on time and within budget.

## PECo provides full service Laser and Capacitor Discharge Welding and related manufacturing requirements.

PROTOTYPING

Meet your quick turnaround needs by putting PECO's 60+ years experience and in-house expertise to work for you! PECO Production Manufacturing reduces your risk and is a cost effective alternative to the purchase and maintenance of welding and related systems.

### Outsourcing

When you need low, medium or high volume production, PECO will satisfy your end customer by providing:

- quality parts
- delivered on time
- within budget

Whether this is a temporary contract to fill an emergency production requirement or a long term production contract, PECO becomes your partner, one that simply operates as an extension of your operation.

### Design

If you need expert advice on designing your metal joining solution, ask PECO.

Our experienced welding engineers will help you with your weld development, prototyping, and feasibility study needs to improve the quality, reliability and cost competitiveness of your component.

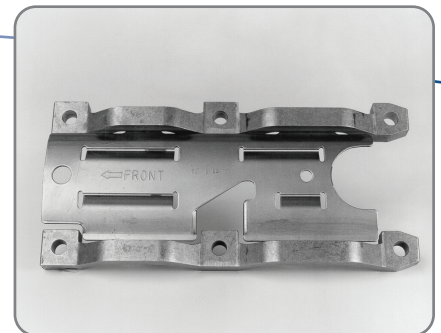

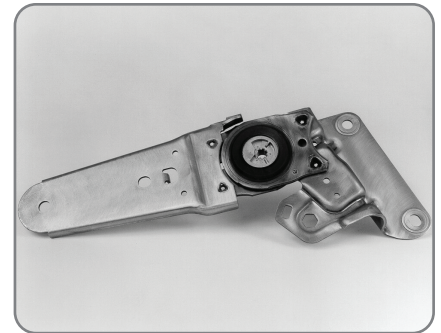

### Try Before You Buy

If you are contemplating a new welding process and want to evaluate the results before you commit to a capital purchase or if you have production needs before your equipment is installed, contact PECO to fill your interim demand.

### Free Initial Consultation\*

Want advice on your metal joining needs? Call the experts at PECO! Send your drawings and sample parts for a free applications evaluation and sample weld.

\* Charges may be necessary for special tooling or machining.
